

# Swisscanto (CH) Index Commodity Fund NTH1 CHF

Other | reinvesting | August 2025 - Marketing Material

## Fund Description

The objective of the subfund is to track the return and risk profile of the benchmark.

Currency fluctuations between the currency of this share class and the investment currencies of this fund are hedged (portfolio currency hedging)\*.

## Sustainability Policy

These assets are not managed sustainably. Exclusions in accordance with SVVK-ASIR (Swiss Association for Responsible Investments) are applied.

## Profile/Suitability

This product is suitable for investors who

- have a long-term investment horizon.
- wish to participate in the development of the commodities market and wish to benefit from the yield potential of the underlying benchmark index. An excess return compared to the benchmark index cannot be expected.

Live Cattle (CME \$/lbs)	4.10	4.12
LME Pri Alum Future	4.04	4.04

\* Notes on the breakdowns can be found in the comments to the fund.

# Comments to the Fund

## Target Investor Group - Term

Institutional investors with necessary contract

## Target Investor Group - Description

N class is offered exclusively to Zürcher Kantonalbank investors with an individual asset management agreement and institutional investors with an individual investments contract, as well as institutional investors of other partners of Swisscanto Fund Management Company Ltd. with the corresponding agreement. An additional requirement is the conclusion of a cooperation agreement. The second letter «T» indicates that the class reinvests profits (accumulating). The designation «H1» in the third position indicates that the class provides for currency hedging (only shown for hedged classes).

## Flat Fee (FF)

The AIF is used to compensate the fund management company and fund administration, asset management and - if compensated - the distribution of the fund as well as the custodian bank for the services it provides.

## Charging Fee N-Class

The charging fee applied to the N-Classe is shown at a rate of 0%, as the FF is charged in the context of the individual asset management agreement.

## Total Expense Ratio (TER)

The Total Expense Ratio (TER) refers to the annual costs that are continuously charged to the fund's assets and is expressed as a percentage of the fund's assets. The figure corresponds to the level of the TER in the most recently completed financial year and does not guarantee a similar level in the future.

## Issue and redemption charges in favour of funds ("crossing")

The fact sheet mentions the currently valid and maximum charges incurred. To protect existing investors and cover transaction costs, the fund management credits all issue and redemption charges to the respective sub-fund assets. Issue and redemption charges in favour of the fund are reduced to the extent that issues and redemptions can be offset against each other on a bank working day (known as "crossing"). As a result, charges may be reduced. For further information, see fund agreement.

## Swinging single pricing (SSP) indirectly

According to fund master data, this fund does not exhibit any swinging single pricing (SSP). However, it cannot be ruled out that an investment is made in a target fund with SSP indirectly.

## License terms of external data providers

"BLOOMBERG®" and the Bloomberg indices listed herein (the "Indices") are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the Indices (collectively, "Bloomberg") and have been licensed for use for certain purposes by the distributor hereof (the "Licensee"). Bloomberg is not affiliated with Licensee, and Bloomberg does not approve, endorse, review, or recommend the financial products named herein (the "Products"). Bloomberg does not guarantee the timeliness, accuracy, or completeness of any data or information relating to the Products.

## Explanation of general risks

Investment involves risks, especially with regard to fluctuations in value and return. Investments in foreign currencies are subject to exchange rate fluctuations. Custody and counterparty risks represent further significant risks. We hereby refer to the detailed description of various risks which are included in the prospectus.

## Risk Indicator

The historical data used to calculate the risk and return category cannot be used as a reliable indication of the future risk profile. The reported risk and return category may well be subject to change. The lowest risk category cannot be compared with a risk-free investment. There is no capital guarantee or capital protection. The risk of capital loss is borne by the investor.

## Hedging

NAV hedging: Currency fluctuations between the currency of this share class and the fund currency are hedged. The objective of NAV hedging is to transfer the performance in the fund currency to the performance of the currency of this share class. Over or under- hedging may occur due to market fluctuations or due to cost considerations.

Portfolio currency hedging: Currency fluctuations between the currency of this share class and the investment currencies of this fund are hedged. The objective of portfolio currency hedging is to hedge the investment currencies of this fund against the currency of this share class. Over or under- hedging may occur due to market fluctuations or due to cost considerations.

## Notes on the Breakdowns

– Minor deviations can be caused by rounding errors.

## Breakdown Allocations

Allocation refers to invested fund capital adjusted to 100%. Minor deviations can be caused by rounding errors. The weighting of the money market may include the synthetic exposure from the equity hedging strategy.

## Tracking Error

Tracking error describes the volatility of differences in performance between a fund and its benchmark. Tracking error is a measure of the active risk of the portfolio manager. Passively managed funds have a low tracking error.

### **Volatility**

Volatility is a statistical measure of risk which indicates the extent to which the absolute return on an investment or a portfolio fluctuates on average around its mean value in the course of a year.

### **Sharpe Ratio**

The Sharpe ratio is a performance measure which indicates the risk-adjusted excess return (difference between the portfolio return and the risk-free return) compared to the investment risk incurred (volatility).

### **Greenhouse gas emissions in kg/m<sup>2</sup>/Year**

The greenhouse gas emissions generated by heating and hot water preparation are taken into account. The values are based on a model calculation and data enrichment methods are used. The greenhouse gas emissions of the individual properties are aggregated at portfolio level on a capital-weighted basis. The portfolio's greenhouse gas emissions are calculated by IAZI AG at the end of each year.

### **Distribution of energy carrier**

The energy source mix shows the distribution of the primary energy sources for heating and hot water preparation. The values are based on a model calculation and data enrichment methods are used. The energy sources of the individual properties are aggregated at the portfolio level with equal weighting. The energy source mix is calculated by IAZI AG at the end of each year.

### **ISO Certification**

Asset Management at Zürcher Kantonalbank is ISO 9001 certified. The ISO 9001 certification guarantees that the authorised user has a management system that meets the requirements of a suitable and recognised standard and has been successfully certified/assessed by the Swiss Association for Quality and Management Systems (SQS).

### **Reporting**

- Analyses and data from MSCI Inc. ([www.msci.com](http://www.msci.com)) were used to compile this report.
- Allocations by sector and credit rating are categorised according to the index provider.
- Copyright 2025 MSCI Inc. All rights reserved.

### **SVVK-ASIR**

The Swiss Association for Responsible Investments (SVVK) is an association of institutional investors and was founded in 2015. The association provides services to its members so that they can focus their investment decisions on the environment, society and the economy.
