## Investment Policy

The fund is managed with an indexed method and is distinguished by broad diversification, low tracking errors, and low-cost management. The investment objective is to replicate the reference index as closely as possible and to minimize performance deviations from the benchmark. The Bloomberg Global Aggregate ex CHF 1-5Y Index is a broad-based flagship benchmark that measures the investment grade debt. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both develop and emerging markets issuers.

The fund follows the exclusion recommendations of the Swiss Association for Responsible Investments ([www.svk-asir.ch](http://www.svk-asir.ch)). The recommendations affect issuers whose conduct or products violate the normative criteria of SVVK-ASIR, e.g. violations of international conventions or production of controversial weapons. This fund is not a sustainable fund and it does not integrate any environmental, social and governance (ESG) considerations into its investment process. The fund does not meet Credit Suisse Asset Management (CSAM) Sustainable Investing Policy, nor any specific client or investor sustainability preferences.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

## Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments generally have low credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. However, this Fund's investments should generally have good liquidity.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Subfund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

**Investors may lose part or all of their invested amount. The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only. The full offering documentation including complete information on risks may be obtained free of charge from a UBS client advisor, representative, or, where applicable, via Fundsearch (credit-suisse.com/fundsearch).**

## Risk profile<sup>2</sup>

PRIIP SRI

Larger values (up to 7) indicate higher risk while lower values (up to 1) indicate lower risk.

<sup>2</sup> The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.
