

Swisscanto (CH) IPF I Index Real Estate Fund North America indirect NT CHF

Real Estate | reinvesting | January 2026 - Marketing Material

swisscanto

Managed by

Fund Description

The fund's objective is to replicate the risk and return characteristics of the benchmark index. The group of investors of this sub-fund is limited to Swiss occupational pension schemes (2nd pillar).

The benchmark was amended on 15 November 2018 (historical benchmark: FTSE EPRA Nareit North America Index (NR)).

Sustainability Policy

These assets are not managed sustainably. Further information on stewardship can be found in the explanations.

Notes:

- Light-coloured sustainability characteristics and approaches are not applicable to the assets in question.
- Exclusions in accordance with SVVK-ASIR (Swiss Association for Responsible Investments) are applied.

Profile/Suitability

This product is suitable for investors who

- have a long-term investment horizon.
- wish to participate in the development of the North American real estate markets and wish to benefit from the yield potential of the underlying benchmark index. An excess return compared to the benchmark index cannot be expected.

Explanations of the Investment Stewardship Approach

Stewardship - Voting / Engagement

As a shareholder, we actively engage in continuous dialogue with the companies management. This takes place in accordance with the engagement guidelines of Zürcher Kantonalbank's asset management. Among other things, companies are required to formulate ambitious greenhouse gas reduction targets, implement them consistently and report on them transparently. Our engagement activities and guidelines are published on <https://www.zkb.ch/en/home/asset-management/sustainability/investment-stewardship.html>. Our voting guidelines are based on Swiss and international corporate governance principles and on the United Nations Principles for Responsible Investment (UN PRI). The threshold for exercising voting rights in our foreign voting markets is CHF 2 million per shareholding. For Swiss shares, we vote across the board. More information on our voting behaviour can be viewed at: <https://www.swisscanto.com/voting>

Sustainability approaches

The sustainability approaches apply to all assets or to a substantial part of the assets. Detailed information on this can be found in the prospectus, fund agreement or investment guidelines.

SVVK-ASIR

The Swiss Association for Responsible Investments (SVVK) is an association of institutional investors and was founded in 2015. The association provides services to its members so that they can focus their investment decisions on the environment, society and the economy.

Comments to the Fund

Target Investor Group - Term

Institutional investors with necessary contract

Target Investor Group - Description

N class is offered exclusively to Zürcher Kantonalbank investors with an individual asset management agreement and institutional investors with an individual investments contract, as well as institutional investors of other partners of Swisscanto Fund Management Company Ltd. with the corresponding agreement. An additional requirement is the conclusion of a cooperation agreement. The second letter «T» indicates that the class reinvests profits (accumulating).

Flat Fee (FF)

The AIF is used to compensate the fund management company and fund administration, asset management and - if compensated - the distribution of the fund as well as the custodian bank for the services it provides.

Charging Fee N-Class

The charging fee applied to the N-Classe is shown at a rate of 0%, as the FF is charged in the context of the individual asset management agreement.

Total Expense Ratio (TER)

The Total Expense Ratio (TER) refers to the annual costs that are continuously charged to the fund's assets and is expressed as a percentage of the fund's assets. The figure corresponds to the level of the TER in the most recently completed financial year and does not guarantee a similar level in the future.

Issue and redemption charges in favour of funds ("crossing")

The fact sheet mentions the currently valid and maximum charges incurred. To protect existing investors and cover transaction costs, the fund management credits all issue and redemption charges to the respective sub-fund assets. Issue and redemption charges in favour of the fund are reduced to the extent that issues and redemptions can be offset against each other on a bank working day (known as "crossing"). As a result, charges may be reduced. For further information, see fund agreement.

Swinging single pricing (SSP) indirectly

According to fund master data, this fund does not exhibit any swinging single pricing (SSP). However, it cannot be ruled out that an investment is made in a target fund with SSP indirectly.

License terms of external data providers

Benchmarks Disclaimer - CORPORATELSEG is the administrator of certain indices and benchmarks as detailed at <https://www.lseg.com/en/ftse-rus-sell/benchmarks>. No other information provided, displayed or contained in any LSEG service is made available for use as a benchmark, whether in relation to a financial instrument, financial contract or to measure the performance of an investment fund, or otherwise in a way that would require the relevant information to be administered by a benchmark administrator pursuant to the Benchmarks Regulation (the "Prohibited Use"). LSEG does not grant rights for you to access or use such information for the Prohibited Use and you may breach the Benchmarks Regulation and/or any contract with LSEG if you do. In the event that you identify the Prohibited Use of information by any person, you must promptly notify LSEG and provide such details as we may reasonably request to ensure the cessation of the Prohibited Use, where appropriate. Notwithstanding the foregoing, where you have entered into a direct license with a third-party provider which permits the Prohibited Use with respect to such third party provider's information, you are solely responsible for compliance with Benchmarks Regulation and LSEG shall have no liability or responsibility for any loss or damages that arise from or in connection with

nection with the Prohibited Use. LSEG and its affiliates do not warrant that any information is provided in compliance with the Benchmarks Regulation and accept no liability and have no responsibility for any loss or damages that arise from or in connection with the Prohibited Use of the information. "Benchmarks Regulation" means, in respect of the EEA, EU Regulation 2016/1011, in respect of UK, UK benchmarks regulation and in respect of another country, the equivalent legislation. If you are in any doubt about the meaning of the Prohibited Use or your obligations under the Benchmarks Regulation, you should seek professional advice.

Explanation of general risks

Investment involves risks, especially with regard to fluctuations in value and return. Investments in foreign currencies are subject to exchange rate fluctuations. Custody and counterparty risks represent further significant risks. We hereby refer to the detailed description of various risks which are included in the prospectus.

Risk Indicator

The historical data used to calculate the risk and return category cannot be used as a reliable indication of the future risk profile. The reported risk and return category may well be subject to change. The lowest risk category cannot be compared with a risk-free investment. There is no capital guarantee or capital protection. The risk of capital loss is borne by the investor.

Breakdown Allocations

Allocation refers to invested fund capital adjusted to 100%. Minor deviations can be caused by rounding errors. The weighting of the money market may include the synthetic exposure from the equity hedging strategy.

Tracking Error

Tracking error describes the volatility of differences in performance between a fund and its benchmark. Tracking error is a measure of the active risk of the portfolio manager. Passively managed funds have a low tracking error.

Volatility

Volatility is a statistical measure of risk which indicates the extent to which the absolute return on an investment or a portfolio fluctuates on average around its mean value in the course of a year.

Sharpe Ratio

The Sharpe ratio is a performance measure which indicates the risk-adjusted excess return (difference between the portfolio return and the risk-free return) compared to the investment risk incurred (volatility).

ISO Certification

Asset Management at Zürcher Kantonalbank is ISO 9001 certified. The ISO 9001 certification guarantees that the authorised user has a management system that meets the requirements of a suitable and recognised standard and has been successfully certified/assessed by the Swiss Association for Quality and Management Systems (SQS).
