

# CSIF (CH) III Equity World ex CH Minimum Volatility - Pension Fund

## Class DBH

### Investment policy

The fund is managed with a "passive" approach and is distinguished by its broad diversification, minimal tracking error, and cost-effective management.

Strategy indices deliberately deviate from market capitalization in their weighting in order to capture factor premiums or reduce the investment risk.

MSCI Minimum Volatility is a strategy index that determines the portfolio with the least volatility from the stocks of the parent MSCI index. The index has historically shown lower realized volatility and lower beta relative to the MSCI parent index, with a bias toward stocks in smaller companies, less volatile stocks, and stocks with lower idiosyncratic risks.

### BVV2

- The fund only invests in equity instruments permitted in accordance with Art. 53 para. 1d BVV 2.

<sup>1)</sup> Historical performance indications and financial market scenarios are no reliable indicators of future performance. The performance data do not take into account the commissions and costs incurred on the issue and redemption of fund units.

<sup>2)</sup> The ongoing charge is based on estimated values of all costs levied to the subfund. The figure may vary from year to year. The calculation is based on SFAMA guidelines.

<sup>3)</sup> Official benchmark of the presented share class is MSCI World ex Switzerland Min. Vol. (NR) (CHF-Hgd). MSCI World ex Switzerland (NR) (Hedged into CHF) is used for comparison purposes only.

<sup>4)</sup> The exclusions of the Swiss association for responsible investments (SVK-ASIR) apply only to in-house funds and products. External funds, ETFs, and futures are not included.

## Potential risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. However, this Fund's investments should generally have good liquidity.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.
