Investment Policy

The fund is managed with an indexed method and is distinguished by broad diversification, low tracking errors, and low-cost management. The investment objective is to replicate the reference index as closely as possible and to minimize performance deviations from the benchmark. The Swiss Performance Index Extra (SPI Extra) includes all SPI equities except for Swiss blue chips. These are shown in the SMI. The SPI EXTRA is quickly becoming an indispensable benchmark for those investors who invest specifically in small and medium-sized Swiss enterprises.

The fund follows the exclusion recommendations of the Swiss Association for Responsible Investments (www.svk-asir.ch). The recommendations affect issuers whose conduct or products violate the normative criteria of SVVK-ASIR, e.g. violations of international conventions or production of controversial weapons. This fund is not a sustainable fund and it does not integrate any environmental, social and governance (ESG) considerations into its investment process.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.
