

UBS Index Fund Bonds CHF ESG NSL I-A-acc

Fund Fact Sheet

Bond > Corporates > CHF

Fund description

- The fund is managed using an indexed approach and is distinguished by its broad diversification, low tracking error, and low-cost management.
- The investment objective is to replicate the benchmark as closely as possible and to minimize performance deviations from the benchmark.
- The SBI® ESG AAA-BBB Total Return Index is a fixed rate, investment-grade corporate bond benchmark that provides exposure to companies with high Environmental, Social and Governance (ESG) performance relative to their sector peers.

Risks

This UBS index fund invests mainly in CHF bonds of first-class issuers included in the relevant index. Investors require a corresponding risk tolerance and capacity. Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure. Sustainability risk: the risk arising from any environmental, social or governance events or conditions that, were they to occur, could cause a material negative impact on the value of the investment. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. As a result, the net asset value of the funds assets is directly dependent on the performance of the underlying index. Losses that could be avoided via active management will not be offset.

Your capital is at risk. The value of an investment may fall as well as rise and you may not get back the original amount. Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.

For marketing and information purposes by UBS. For professional clients / qualified investors only. UBS funds under Swiss law. Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s). Before investing in a product please read the latest prospectus and key information document or similar legal documentation carefully and thoroughly. Any decision to invest should take into account all the characteristics or objectives of the product as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Any Index referenced in this document is not administered by UBS. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the product level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future. The details and opinions contained in this document are provided by UBS without any guarantee or warranty and are for the recipient's personal use and information purposes only. This document may not be reproduced, redistributed or republished for any purpose without the written permission of UBS Asset Management Switzerland AG or a local affiliated company. Source for all data and charts (if not indicated otherwise): UBS Asset Management. A summary of investor rights in English can be found online at www.ubs.com/funds-regulatoryinformation. More explanations of financial terms can be found at www.ubs.com/am-glossary. This document contains statements that constitute "forward-looking statements", including, but not limited to, statements relating to our future business development. While these forward-looking statements represent our judgments and future expectations concerning the development of our business, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from our expectations. **Switzerland:** Only occupational pension schemes domiciled in Switzerland, their asset managers (for the assets of these institutions) and other investment foundations are eligible investors in investment foundations, in accordance with the Ordinance on Investment Foundations (ASV). Prospectuses, key information document, the articles of association or the management regulations as well as annual and semi-annual reports of UBS funds are available in a language required by the local applicable law free of charge from UBS Asset Management Switzerland AG, c/o UBS AG, Bahnhofstrasse 45, 8001 Zürich or from UBS Fund Management (Switzerland) AG, P.O. Box, CH-4002 Basel.

ESG Report

Terms used within this document do not refer to or relate to any regulatory definitions or provisions. Where applicable, a country-specific notice is provided in this document and must be read in conjunction with the factsheet.

ESG is an abbreviation for Environmental, Social and Governance (factors). These factors are used to evaluate companies and countries on how advanced they are with respect to sustainability. Once sufficient data on these factors are available, they can be used to assess and compare assets and also to inform the investment process when deciding what assets to buy, hold or sell.

In addition to the fund's specific ESG characteristics and/or objectives, the details of which can be viewed in the fund's legal documents, the following approaches are applied:

☒ Exclusion ☒ ESG Integration ☐ Voting ☐ Engagement program

For more information refer to the glossary. Source: UBS Asset Management

The following illustrations provide transparency on key sustainability metrics that may be of interest to investors but may not be part of the fund's investment process. This information is provided to enable comparison with other financial products and to help investors assess their exposure to ESG topics.

Glossary

Carbon footprint: Expresses the greenhouse gas footprint of an investment sum. The carbon emissions scope 1 and 2 are allocated to investors based on an enterprise value (including cash) ownership approach and are normalized by the current fund value. The carbon footprint is a normalized measure of a fund's contribution to climate change that enables comparison with a benchmark, between funds and between individual investments. The metric is total carbon emissions expressed as per currency invested.

The metric is scaled up to 100%, if actual data coverage is above the defined thresholds – fixed income: 50%, equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-".

Classification system to separate corporate and sovereign issuers: Bloomberg Barclays Methodology. Securitised bonds are excluded from the calculation. "No exposure" if the fund is not invested in the respective issuers for the month.

Controversy check: Controversial Business Involvement exposure is the exposure to companies with a revenue share exceeding a certain threshold of the respective field (production). Link to our exclusion policy for more details: -> www.ubs.com/si-exclusion-policy

MSCI ESG scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The individual MSCI E-, S-, and G-score indicates the resilience of issuers to environmental, social or governance related risks that are most material to an industry. The aggregated MSCI ESG score is based on these MSCI E-, S-, and G-scores but normalizes them relative to industry peers. This leads to a weighted average industry-adjusted MSCI ESG score which is comparable across industries. The metric is scaled up to 100% if actual data coverage is above the defined thresholds – fixed income: 50%, equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-".

UBS AM sustainability approaches applied:

Exclusion: Strategies that exclude securities from funds where they are not aligned to an investor's values. Includes customized screening criteria.

ESG Integration: Strategies that integrate environmental, social and governance (ESG) factors into fundamental financial analysis to improve the risk/return profile.

Voting: UBS Asset Management will actively exercise voting rights based on the principles outlined in the UBS Asset Management Proxy Voting policy and our stewardship approach, with two fundamental objectives: 1. To act in the best financial interests of our clients to enhance the long-term value of their investments. 2. To promote best practice in the boardroom and ensure that investee companies are successful. This is not an indication that voting on sustainability-related topics has taken place with respect to companies in this portfolio during any given time period. For information about voting activities with specific companies please refer to the UBS Asset Management Stewardship Annual Report.

Engagement program: We regard engagement to be a two-way mutually beneficial dialogue with an issuer / company, with the objective to share information, enhance understanding and help to improve business practices and performance. The issuers / companies we engage with are selected from across the universe in which UBS Asset Management invests using a top-down approach in accordance with our principles, as outlined in our stewardship approach. This is not an indication that sustainability-related engagement has taken place with respect to issuers / companies in this portfolio during any given time period or that issuers / companies in this portfolio were chosen with the goal to actively engage. Information on UBS Asset Management's selection of issuers / companies, engagement activities, prioritization process and understanding of concerns can be found in the UBS Asset Management Stewardship Annual Report and in our stewardship approach.

Weighted average carbon intensity – corporate issuers/ carbon-intensive sovereign issuers: These metrics measure a fund's exposure to carbon-intensive companies and governments. These metrics provide an insight into potential risks related to the transition to a lower-carbon economy, because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. These metrics are applicable across asset classes. It is the sumproduct of the fund weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales or GDP). The metric is scaled up to 100% if actual data coverage is above the defined thresholds – fixed income, 50%; equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-". Classification system to separate corporate and sovereign issuers: Bloomberg Barclays Methodology. Securitised bonds are excluded from the calculation. "No exposure" if the fund is not invested in the respective issuers for the month.

Active ESG: Benchmark selection is driven by portfolio implementation considerations, in particular to closely reflect the financial objectives of the fund. For actively managed strategies, a traditional benchmark is generally selected to provide a broad investment universe to which active management is applied. This enables an assessment of the magnitude of ESG improvements against the traditional benchmark and allows the costs and benefits of investing sustainably to be assessed.

Fund of funds investments, derivatives and cash:

Derivatives and fund of funds investments used in the portfolio are treated on a lookthrough basis, whereby the economic exposures to the underlying basket of securities is treated as an actual investment in the individual securities that make up this basket. Broad market derivatives or fund of funds investments may lead to minimal exposures to securities that are excluded from direct investments. Derivatives have an effect on all metric calculations. Given that many of the reporting frameworks available to investors today do not cover the intricacies of derivatives, metrics are provided on a reasonable efforts basis. Portfolios for which we report the

UBS Index Fund Bonds CHF ESG NSL

ESG Report

sustainability metrics may include cash. The information disclosed in this report, in particular the treatment of derivatives and cash, may or may not correspond with the investment characteristics of the fund and how the fund is

managed. The sustainability metrics in this report may therefore differ from other UBS reports produced on the same date.

Important information about sustainable investing strategies

Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and fund construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or sustainable investing considerations may inhibit UBS's ability to participate in or to advise on certain investment opportunities that otherwise would be consistent with the Client's investment objectives. The returns on a fund consisting primarily of sustainable investments may be lower or higher than funds where ESG factors, exclusions, or other sustainability issues are not considered by UBS, and the investment instruments available to such funds may differ. Companies, product issuers and/or manufacturers may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues.

Reconciliation of Assets under Management (AuM)

This report does not contain reconciled AuM positions, it only takes in consideration positions with settlement date as of report date. This means that traded but not settled positions are not included. Therefore, AuM figures in this report may differ from other UBS reports produced on the same date.
